

GEOGRAPHY — SEMESTER - I

5 lesson(s) included, 1 missing

Included:

- Chapter – 1 Maps & Diagrams
- Chapter – 2 Elements of a Map
- Chapter – 3 Major Landforms of the Earth
- Chapter – 4 Major Water Bodies
- Chapter- 8 North America

MISSING (no downloaded Question Bank found):

- Map work: North America physical & political

Question -1

State whether the following statements are true or false. Correct the false statement.

- 1 .Plan is the most accurate three-dimensional representations of the earth.
2. Fold mountains formed due to sinking of the adjacent land.
3. The arches of a fold are known as meander.
4. The Survey of India was established in 1768.
5. Physical maps show the boundaries of countries and state.
6. A map is a rough drawing showing the relative locations of a few chosen features of an area,

Question -2

Choose the best answer.

1. Who is called as 'father of Indian Geographer'?
a. Joseph Crompton b. Joh Dalton c. James Rennell d. Robert Caldwell
- 2.The art of drawing a map is known as _____
a. Cartography b. Autobiography c. Biography d. Psychology
3. _____ uses maps to determine the route.
a. Journalist b. Navigators c. Scientist d. Pharmacist
4. Assertion (A) A sketch is a rough representation of the area.
Reason (R) It is usually used to show people how to go from one place to another.
Both A and R are true but R is not the correct explanation of A.
Both A and R are true R is the correct explanation of A.
A is true, but R is false.
A is false, but R is true.

Question – 3

Name the following.

1. An object that models the Earth as a sphere
2. A stream of water which flows in a channel from high ground to low ground.
3. A loop-like bend in a river.
4. A smaller watercourse that empties into a bigger one.
5. A collection of different types of maps in the form of a book.

Question – 4

Explain the following geographical terms.

- a. Meander - _____
- b. Anticlines - _____
- c. Delta - _____
- d. Tributary - _____
- e. Synclines - _____

Question – 5

Answer the following.

1. Differentiate between a Globe and a map.
2. How are block mountains formed?
3. List out the different types of map.
4. How does the distributary differ from a tributary in a river system?
5. Tabulate the differences between a Political map and a Physical map.
6. Explain the term 'cartography'.
7. 'Topographical map give detailed information of a particular place'. – Give Reason.

Lesson – 2 The Elements of a map

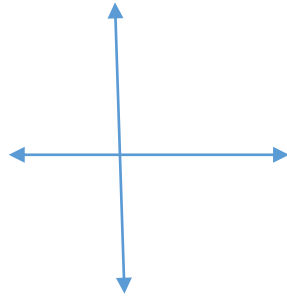

A. Choose the best answer :

1. _____ helps in calculating the distance between two places on the map.
a. Scale b. Legend c. Key d. North line
2. The colour used to show agricultural land in a map is
a. White b. Yellow c. Green d. Brown
3. The scale which is stated in words.
a. Graphical scale b. Linear scale c. Verbal scale d. Representative fraction
4. The _____ lies to the north of the Tropic of Cancer.
a. Tropic of Capricorn b. Equator c. The Arctic circle d. The Antarctic circle
5. The longest latitude is _____
a. Great circle b. Prime Meridian c. International Date line d. Greenwich mean time
6. Assertion (A): A legend or Key is an essential feature of a map.
Reason (R) : It explains the colours, signs and symbols used in the map.
a) Both A and R are true but R is the correct explanation of A
b) Both A and R are true but r is not the correct explanation of A
c) Both A and R are true
d) Both A and r are False

Answer the following questions :

1. Name the four cardinal directions.
2. Bring down the use of title in the map.
3. Define the term "Grid system.
4. What do you mean by conventional signs and symbols?
5. Define Map scale.
6. What do you mean by legend?
7. Bring down the uses of these colours in the map:
a. Green b. White c. Blue d. Red

8. Mark the cardinal directions and intermediate directions :

9. Differentiate between latitudes and longitudes.

10. Mention any two advantages of grid system.

Chapter 3 Major Landforms

Question 1

Choose the correct answer

1. Which of the following is a major landform?

- a) River b) Lake c) Mountain d) Island

2. Fold mountains are formed due to

- a) Deposition b) Compression of rock layers
c) River erosion d) Volcanic eruptions

3. The Himalayas are examples of

- a) Old fold mountains b) Young fold mountains
c) Block mountains d) Volcanic mountains

4. Which is the largest continent?

- a) Africa b) Europe c) Asia d) North America

5. A depression surrounded by higher land is called a

- a) Plateau b) Basin c) Peninsula d) Plain

Question 2

Write whether the given statements are true or false, if false correct the statement

1. Mountains are low-lying areas.
2. Fold mountains are formed by compression of rock layers.
3. The Himalayas are old fold mountains.
4. Mt Fuji is a volcanic mountain.
5. Plateaus are always formed by rivers.

Case Study 1: Formation of Fold Mountains

Passage:

When tectonic plates move towards each other, layers of rocks get compressed and folded. These folds rise to form fold mountains. The Himalayas, Alps and Andes are examples.

Questions 3

- a) What causes fold mountains to form?
- b) Which process acts on the earth's crust here?
- c) Name one young fold mountain in Asia.
- d) Name one fold mountain in Europe.
- e) Are fold mountains formed by compression or deposition?

Case Study 2: Plains

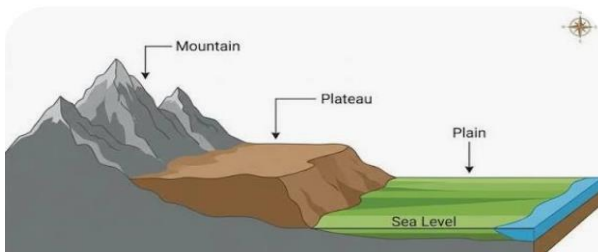

Passage:

Plains are vast lowlands generally below 200 metres. They are fertile and densely populated.

Questions 4

- a) Why are plains densely populated?
- b) What type of soil is commonly found in river plains?
- c) Why is transport easier in plains?
- d) Name one important plain of India.
- e) Which economic activity thrives in plains?

Question 5

- a) Identify the flat-topped landform.
- b) List out the different types of plateaus.
- c) Name one plateau in India.
- d) What is an intermontane plateau? Give an example.
- e) What are dissected plateaus? How are they formed?
- f) What is the importance of plateaus?

Question 6

Give geographical reason

1. Why are roads and railways easier to construct in plains?

2. Why do many rivers originate in mountains?
3. Why are volcanic plateaus fertile?
4. Why is tourism important in mountain regions?
5. Why are valleys suitable for human settlements?

Question 7

1. Your family wants to start a tourism business. Which mountain advantages would help them?
2. A government plans to build an international airport. Would a plain or a mountain be more suitable? Explain.
3. A volcanic eruption occurs near a settlement. What problems might the people face?

Question 8

- 1.Explain how internal and external processes together shape the earth's surface.
- 2."Mountains are both a boon and a challenge." Justify.
- 3.How do landforms influence human life and settlements?
- 4.Compare fold mountains, block mountains and volcanic mountains.

Question 9

Name the following

- 1.A deep valley with steep sides of rock.
- 2.A deep narrow valley with near vertical sides.
- 3.A very large land mass surrounded by vast water bodies.
4. An exposed or empty place with no pleasant features.
- 5.The opening through which lava comes to the surface.

Question -1

State whether the following statements are true or false. Correct the false statement.

1. The tropical islands of the Caribbean Sea are collectively called as Elizabeth Islands.
2. Lumbering is traditionally done in the summer season.
3. The central lowlands consist of thousands of rolling hills, large and small lakes.
4. The Tropic of Cancer passes through Cuba.
5. North America lies in the southern and Eastern hemispheres.

Question -2

Choose the best answer.

1. North America, together with South America is referred to as the _____
a. New Country b. New World c. New Nation d. New Continent
2. _____ is the cutting down of trees and the process leading to the manufacture of products.
a. Lumbering b. Afforestation c. Sapling d. Transporting
3. _____ is the largest island in the world.
a. Sri Lanka b. Greenland c. Maldives d. Cuba
4. Assertion (A) Lumbering is traditionally done in the winter season
Reason (R) The sap in the trees is frozen, making it easier to cut trees.
Both A and R are true but R is not the correct explanation of A.
Both A and R are true R is the correct explanation of A.
A is true, but R is false.
A is false, but R is true.

Question – 3

Name the following.

1. Workers engaged in lumbering.
2. The plateau surrounded by mountains on all sides.
3. The highest peak in the Eastern highland.
4. The largest lake in North America.
5. The largest river in North America.

Question – 4

Answer the following.

1. Differentiate between Western cordilleras and Appalachians.
2. Name the landforms which connect North America and South America.
3. Explain the term 'Intermontane plateau' and give any two examples.
4. List out the rivers drains into Pacific Ocean.
5. Write a short note on the life of Lumberjacks.
6. How is the work of High riggers different from Sawers.
7. The Canadian Shield region consists of more lakes. – Give reason.
8. Explain the 'Pacific Ring of Fire'.
9. Name the Great five lakes.
10. List out the physical features found in North America.
