The Vikasa School, Tuticorin
Question Bank
Subject: Social Studies
Class: IV
Chapter-5: Motion of the Earth

I. Choose the Best Answer

1. The Earth rotates on its
a) orbit b) axis c) surface d) pole
2. Revolution takes
a) 24 hours b) 30 days c) 365 1/4 days d) 12 hours
3. We experience day and night because of
a) rotation b) spinning c) revolution d) sun
4. The path of the Earth around the Sun is called
a) axis b) pole c) equator d) orbit

II. Name the Following

1. The imaginary line on which the Earth spins.
2. The side of the Earth away from the Sun.
3. The effect caused by the Earth's rotation.
4. The movement of the Earth around the Sun.
5. The planet on which we live.

III. Fill in the Blanks

1. One rotation of the Earth takes about hours.
2. A leap year has days.
3. The Earth rotates from to.....
4. We celebrate a leap year everyyears.
6. Rotation causes and

IV. Match the Following

- | | |
|---------------|-------------------------|
| 1. Axis | a. 24 hours. |
| 2. Revolution | b. Path around the Sun. |
| 3. Orbit | c. Seasons. |
| 4. Rotation | d. Imaginary line. |

V. Answer the Following Questions

1. Name the movements of the Earth.
2. What is rotation?
3. What is revolution?
4. Why do we have a leap year?
5. What is an orbit?
6. Write any four differences between rotation and revolution.
7. How does rotation cause day and night?
8. Explain what happens during one complete revolution.
9. Describe the Earth's axis
10. Which part of the Earth receives sunlight?
11. Draw and explain the Earth's rotation and revolution using neat diagrams.
12. What is an axis ?
13. Which motion of the Earth causes sunrise and sunset?

I. Choose the Best Answer :

1. domain of the Earth is made up of water.
a) Lithosphere b) Atmosphere c) Hydrosphere d) Biosphere
2. The Lithosphere includes the
a) river b) mountain c) oceans d) continents
3. The layer of air surrounding the Earth is called.....
a) biosphere b) hydrosphere c) lithosphere d) atmosphere
4. and oxygen are the main gases found in atmosphere.
a) Nitrogen b) Ozone c) Hydrogen d) Carbon dioxide
5. is an example of the Biosphere.
a) Mountain b) Animals c) Air d) land

II. Fill in the blanks:

1. provides space for humans, animals and plants.
2. Mount Everest is located in.....
- 3..... river is found in the African continent.
4. Northern Hemisphere is also called as
5. is also called as water hemisphere.

III. Name the following:

1. Europe and Asia together called as
2. It covers about one fourth of The Earth's surface.
3. The water present on earth is called.
4. The air that surrounds the earth is called.
5. The solid domain on the Earth.

IV. Answer the following:

1. List out the four main domains which exist on Earth.
2. Write any two features of North America.
3. Write a note on Lithosphere.
4. Write any two features of Hydrosphere.
5. What is an isthmus?
6. Why do living things need air ?

Choose the Best Answer

1. India is broadly divided into major physical divisions.
a) Four b) Five c) Six d) Seven
2. The highest mountain range in the world is the
a) Aravalli Range b) Vindhya Range
c) Himalayas d) Satpura Range
3. Mount Godwin Austen (K2) is located in the
a) Greater Himalaya b) Purvachal Hills
c) Karakoram Range d) Nilgiri Hills
4. Which is the middle range of the Himalayas?
a) Shiwalik b) Middle Himalaya c) Karakoram d) Purvachal
5. Which river divides the southern plateau into two parts?
a) Godavari b) Krishna c) Narmada d) Kaveri
6. The Great Indian Desert is also called the
a) Sahara Desert b) Gobi Desert
c) Thar Desert d) Kalahari Desert
7. Which coast is wider?
a) Eastern Coastal Plain b) Western Coastal Plain
c) Both are equal d) None of these
8. Lakshadweep Islands are situated in the
a) Bay of Bengal b) Indian Ocean c) Arabian Sea d) Pacific Ocean
9. Andaman and Nicobar Islands are situated in the
a) Arabian Sea b) Bay of Bengal
c) Red Sea d) Caspian Sea
10. Which plateau lies in the centre of India?
a) Deccan Plateau b) Chota Nagpur Plateau
c) Central Highlands d) Malwa Plateau

Name the Following

1. The highest mountain range in the world.
2. The outer Himalayas.
3. The eastern hill ranges of India.
4. The fertile plains formed by the rivers Sutlej, Ganga and Brahmaputra.
5. The desert found in Rajasthan.

6. The plateau surrounded by the Western and Eastern Ghats.
7. The coast extending from Gujarat to Kerala.
8. The islands situated in the Arabian Sea.

Fill in the Blanks

1. The Himalayas stretch from..... to Arunachal Pradesh.
2. The highest peak in the Greater Himalaya is
3. The Western Coastal Plain extends from Gujarat to
4. The land surrounded by water on all sides is called an

Answer the Following Questions

1. Name the major physical divisions of India.
2. What is a glacier?
3. Which are the three parallel ranges of the Himalayas?
4. Describe the Greater Himalaya.
5. What are the Purvachal Hill Ranges?
6. Write a note on the Northern Plains.
7. Differentiate between the Western Coastal Plain and the Eastern Coastal Plain.
8. What are the two groups of islands of India?
9. Describe the Southern Plateaus of India.
10. Explain the Central Highlands.
11. Describe the Western Desert.
12. Why are the Northern Plains fertile?
13. How is the Western Coastal Plain divided?
14. How do the Himalayas protect India?
